

In order to access the health facilities of the Dental Clinic of the Department of Biomedical and Neuromotor Sciences and do your practical training, you must fill in the Infection Screening form of the **University Centre for the Protection and Promotion of Health and Safety - Office for Occupational Health and Safety - Occupational Health Centre** (enclosed you will find the Master's Degree Infection Screening Form), send it by e-mail to alessandro.risi@unibo.it and francesca.stagni6@unibo.it, and wait for medical clearance from the occupational health physician.

If candidates fail to submit the required certificates or are not eligible for this service, they will not be able to participate in the dental health activities dedicated to the practical training of the master's degree programme; these activities will be replaced with alternative teaching activities (e.g. project work), with an equivalent workload in terms of university educational credits in order to allow candidates to complete their master's degree.

Under no circumstances will candidates who decide to withdraw from the degree programme be reimbursed for the fees they have already paid, not even if they are not allowed to do their practical training due to the reasons specified above.
