

“Engineer your future: From university to curiosity”

Kick-start your career in Intellectual Property (IP) with our Pan-European Seal Young Professional Programme and play your part in supporting and fostering innovation.

For one to up to three years, you’ll work with an experienced examiner who will guide you through the patent grant procedure as you gain exposure to **cutting edge technologies** and develop a deeper understanding of patent law, international procedures and intellectual property rights. As an engineer, you can **join the programme in one of the following fields of patent examination:**
